PATENT AND TRADEMARK OFFICE NOTICES

Translations of Foreign Language References

Frequently, Office actions cite references that are in a foreign language. In the event a translation of the entire text or portion of the text of the reference is readily available in the examiners' search files, a copy of the translation will normally be included with the Office action. However, applicants are cautioned that the inclusion of a translation with a foreign language reference should not be construed to mean that the examiner used or relied on the translation, or that it is accurate or an official translation made by the Patent and Trademark Office.

While this service may be infrequent, it could be increased by the submission of translations by the applicant to the Office. Accordingly, it is requested that translations of foreign language references be transmitted to the Office, and in particular be transmitted with the response to the Office action or in a separate envelope addressed to: Commissioner of Patents and Trademarks, Washington, D.C. 20231. In addition, it would be of great assistance to the Office in filing the translation, if the translation carried the following: 1. an identification of the foreign language reference and, where possible, 2. its location in the examiners' search files (e.g. location should be known if reference was cited in Office action). If identifying information is not available, the incoming translation should carry the name "Scientific Library" thereon so that it can be processed by the Library.

WILLIAM FELDMAN,
Deputy Assistant Commissioner for Patents.

Entry Into Force of the Patent Cooperation Treaty

The Patent and Trademark Office has received notification that the United Kingdom deposited its instrument of ratification for the Patent Cooperation Treaty (PCT) with the World Intellectual Property Organization (WIPO) in Geneva, Switzerland on October 24, 1977. This ratification fulfilled the requirements for entry into force of the PCT under Article 63 of the Treaty. Article 63 provides that the Treaty shall enter into force three months after eight States have deposited their instruments of ratification or accession, provided that at least four of the States have major patent activity as defined therein. The four countries with major patent activity which have ratified the Treaty are:

Federal Republic of Germany
Switzerland
United Kingdom
United States of America.

Ratifications or accessions to the PCT have also been deposited by:

Cameroon	Madagascar
Central African Empire	Malawi
Chad	Senegal
Congo	Togo.
Gabon	

Since the last required ratification was deposited on October 24, 1977, the Treaty will enter into force three months later, on January 24, 1978. It should be noted that the national PCT implementing legislation, Public Law 94–131 of November 14, 1975 (89 Stat. 685; 942 O.G. 177; and page 108 of the August 1976 issue of "Patent Laws") comes into force on the same day as the entry into force of the PCT. Therefore, Public Law 94–131 will also enter into force on January 24, 1978.

The date from which international applications under the PCT may be filed is currently expected to be in July of 1978; the exact date will be fixed by the Assembly of the PCT. The first meeting of the Assembly is currently expected to take place during April 1978. A copy of the PCT was published in the OFFICIAL GAZETTE on July 14, 1970 at 876 O.G. 341–388.

In view of the entry into force of the Patent Cooperation Treaty (PCT) on January 24, 1978 and the European Patent Convention (EPC) on October 7, 1977, applicants may now wish to prepare their national patent application papers for filing in the United States in the format required by the PCT and the EPC so that the application need not be later retyped and reformatted for PCT or EPC filing. The format requirements for applications under these two Treaties are identical. In the PCT most of these requirements appear in PCT Rule 11 while in the EPC the major requirements are found in EPC Rules 32 and 35.

Shortly after the PCT and Public Law 94–131 come into force, rule changes along the lines of those proposed in the OFFICIAL GAZETTE of February 8, 1977 (955 O.G. 350–363) will be promulgated which will make patent applications prepared in the PCT-EPC format completely acceptable as United States national patent applications.

Since applications may be filed and given a filing date under the EPC beginning June 1, 1978 and the PCT will be operational for the filing of international applications soon thereafter, applications which are currently being filed as U.S. national applications may serve as the basis for priority claims under these Treaties.

Preparation of United States national patent applications in PCT-EPC format is substantially possible today and may eliminate the need for reformatting and retyping the case if it is later filed as a PCT International application or an EPC European application.

There are only a few areas where present U.S. national format requirements conflict with PCT-EPC format requirements. The major differences are the sheet margins; page numbering, which, under PCT-EPC, is at the top; typing, which must be 1½ spaced under PCT-EPC; the location of the title and the abstract; and the drawing sheet size, which must be A4 (21 cm x 29.7 cm) under PCT-EPC. The Office will presently accept applications prepared on A4 size paper, with 1½ spacing between typed lines, page numbering at the top, and the title at the beginning of the abstract and description. In addition, if application papers are filed with the PCT-EPC margins, the margins requirements of 37 CFR 1.52(b) wil not be enforced.

The only remaining format problems are the location of the abstract and the drawing sheet size. Under the PCT-EPC, the abstract must be on a separate sheet which follows the claims. For current filing the title and abstract can be placed on a separate sheet without a number, with the first page of the description also containing the title and being numbered as page 1. For a later PCT-EPC application the abstract can be placed last and numbered in sequence. Drawings may be prepared to comply with the present U.S. national drawing size requirements (8½ x 14 inch sheets) but with a PCT-EPC sight size so that the sheets can later be cut down to A4 size.

Acting Commissioner of Patents and Trademarks.

Manual Subscriptions and Rule and Statute Booklets

All subscriptions to various manuals and rules and the sale of various individual booklets which emanate from the Patent and Trademark Office, are handled by the Government Printing Office. Orders for new subscriptions or for the purchase of individual booklets should be addressed to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Inquiries concerning subscriptions previously placed or concerning revision material issued under a subscription should be addressed to the Superintendent of Documents, U.S. Government Printing Office, Customer Service Section SSOS, Washington, D.C. 20402.

However, as a service to patent and trademark practitioners and other interested parties, the following information is being published regarding revision schedules and rates for manual subscriptions, and rule and statute booklets. This information should be helpful in determining the currency of manuals and rules.

The Manual of Patent Examining Procedure (M.P.E.P.) is revised quarterly, the revisions being numbered consecutively and dated January, April, July and October of each year. The current subscription price for the M.P.E.P. is $19.65 (plus $4.95 for foreign mailing).

Revisions of the Manual of Classification for patents are presently published irregularly. However, beginning in 1978 it will be revised on a regular basis. These revisions will be published quarterly, dated January, April, July and October. The current subscription price for this manual is $44.00 (plus $11.00 for foreign mailing).

The Trademark Manual of Examining Procedure is normally revised annually, the revisions being numbered consecutively and dated January of each year. The current subscription price for the T.M.E.P. is $8.10 (plus $2.05 for foreign mailing).

The Trademark Rules of Practice (including the trademark statute) is revised from time to time whenever changes are made in the rules or the statute. The current Trademark Rules of Practice is the Ninth Edition, dated December 1976, and the current subscription price is $5.00 (plus $1,25 for foreign mailing).

The foregoing publications are available only by subscription. When revisions are issued, they are a part of the subscription and are mailed to subscribers automatically by the Superintendent of Documents of the Government Printing Office without additional charge. The original subscription price covers revisions until the Government Printing Office mails a notice of expiration of the subscription with a statement of the renewal fee necessary for continuing the subscription to the subscriber.

Both the patent rules and trademark rules are contained in an annual publication entitled 37 Code of Federal Regulations which is revised July 1 of each year. The price for the 1977 edition is $3.00 per copy.

The Patent Laws booklet is revised on an as-needed basis. The current edition is dated August 1976 and the current price is $2.10.

Due to the requirements of the printing process, these publications and revisions are generally not available until several months after the date which is printed on the revision or the booklet.
